

# DeCA Uniform Decor 2010

## Adaptive Uniform Decor Package

### General Notes

- A. Refer to the following DeCA Image Enhancement "Adaptive Uniform Decor Package" for recommended placement of all interior decor components and fabrication requirements. Adjust recommended placements as required to accomodate unique features of each specific store layout. Design to be adapted to each stores unique features (i.e. ceiling heights, department wall variations, equipment layout, etc)
- B. Edit files as required to accomodate specific project requirements and incorporate all applicable details into the contract documents.
- C. It is important that suspended lighting, HVAC diffusers and all other utilities (HVAC ductwork, refrigeration piping, sprinkler piping, conduits, etc.) are set so as not to interfere with feature wall decor elements.
- D. Individual sheets may call out brand name products as the basis for design. However, it is not intended that they be proprietary or sole-sourced. The owner will accept an approved equal.
- E. Submit for approval any alterations of decor package or elements for specific store layout.
- F. Color on feature walls to extend minimum of 20' A.F.F. Recommended height for optimal presentation of uniform decor is 21' A.F.F. if trusses can be placed at 21' or higher.
